

David Sumner - iamdavesumner@proton.me, [linkedin.com/in/davidasumner](https://www.linkedin.com/in/davidasumner), [dasumner.github.io](https://github.com/dasumner)
281-222-6742, Houston, TX

Director-level technology leader who connects engineering decisions to business outcomes. Contributed to an \$80M contract renewal through infrastructure and labor cost modeling, and manage utilization and margin health across delivery teams in a low-margin services business. Previously led a cloud transformation at Oracle supporting \$500M in annual revenue while reducing support staffing by 80%. Advisor to enterprises and public institutions on AI procurement, policy, and governance.

CivicActions - Associate Director - 2020 to Present

Business Operations & Resource Management

- Partner with project management, operations, and finance teams to optimize staff utilization rates across delivery teams, balancing project staffing needs, planned time off, holidays, and contract renewal cycles to support company financial health.
- Monitor and respond to shifting labor needs across projects, adjusting staffing plans in real time to maintain delivery quality while protecting margins in the services business.

AI Strategy & Procurement Advisory

- Volunteered with US Digital Response, partnering with a major municipal housing authority to apply AI in streamlining their talent tracking and professional development system.
- Developed and delivered curriculum on AI procurement for the Digital IT Acquisition Professional (DITAP) Program, training federal acquisition professionals to design flexible IT/digital services procurements.

Technical Leadership & Delivery

- Lead a 12-person DevOps engineering practice across multiple federal IT projects, including direct leadership of a team supporting the Centers for Medicare and Medicaid Services contract ([healthcare.gov](https://www.healthcare.gov), [medicare.gov](https://www.medicare.gov), [cms.gov](https://www.cms.gov)), while coordinating with a 50+ person cross-vendor DevOps community within CMS.
- Developed cost models for infrastructure and labor scaling on CMS contract expansion proposals, translating operational data from current environments into financial forecasts that informed bid strategy. This contributed to an \$80M contract renewal and portfolio expansion.
- Improved DORA metrics (deployment frequency, lead time, change failure rate, MTTR) across [healthcare.gov](https://www.healthcare.gov), [medicare.gov](https://www.medicare.gov), and [cms.gov](https://www.cms.gov) by expanding observability with New Relic, Splunk, Prometheus, and Grafana, tuning Akamai CDN/WAF caching rules, and optimizing Acquia-hosted Drupal delivery environments.
- Partner with CMS security and OIG teams to continuously harden systems against identified vulnerabilities; use Amazon Bedrock to mine build pipeline and infrastructure logs for faster, more proactive troubleshooting.
- Restored and maintained SLA uptime after AI-driven bot and scraper traffic pushed total platform traffic up 40% in four months, by building throttling and malicious-request blocking tooling and evolving monitoring to distinguish automated abuse from legitimate usage.

Team Development & Knowledge Sharing

- Mentor junior engineers on technical skills and professional development, supporting team recruitment and retention.
- Author internal documentation on DevOps, Business Continuity, and Disaster Recovery best practices.
- Author GovTech subject matter content used by marketing and sales teams.

Independent Consultant - 2025 to 2026

- Advised the Harris County Department of Education CFO on development of the organization's AI Acceptable Use Policy.
- Guided a nationally recognized employment law firm's MSP selection, using AI-assisted proposal analysis, and advised on the resulting transition roadmap and technical hiring.

Oracle Corporation - Multiple Roles - 1998 to 2019

Cloud Engineer and Architect - 2012 to 2019

- Led migration of Oracle University's global training delivery infrastructure, supporting a \$500M annual revenue business serving over 15,000 students per week, to Oracle Cloud Infrastructure (OCI). This transformation enabled on-demand course delivery to any consumer, anywhere, at any time, while reducing the support team from approximately 200 to 40 staff.
- Led integration of education operations from acquired companies, including Sun Microsystems, JD Edwards, and PeopleSoft, into Oracle University's infrastructure and delivery systems.
- Architected systems supporting the Americas, Europe, Middle East, and Asia Pacific regions.
- Built the delivery system for the Oracle Certified Professional (OCP) exam, Oracle's flagship certification program.

Database Administrator - 2003 to 2012

- Managed database systems supporting the transition from physical desktop and server management to centralized data center delivery for Oracle University facilities, partner organizations, and self-paced global consumers.
- Contributed to testing and delivery of corporate email hygiene systems.

System Administrator - 1998 to 2003

- Supported physical server and desktop infrastructure for Oracle University training facilities.
- Assisted annually in developing capital expenditure budgets for OU hardware, contributing to multi-year infrastructure investment planning.

Technical Proficiencies: GitHub, GitLab, Linux, MacOS, Jenkins, AWS, Splunk, Datadog, New Relic, Prometheus, Grafana, Akamai, Drupal, MySQL, OpenSearch, OWASP, Invicti, NetSparker, CloudFlare, Oracle Database, Terraform, Kubernetes, NIST 800-53

Education

Bachelor of Science in Information Technology, Western Governors University, 2015
